Volvo Construction Equipment is back to power sustainable track building in new FIA World RX season

The 2025 season of the FIA World Rallycross (World RX) Championship has been officially announced to begin this June, with Volvo Construction Equipment (Volvo CE) resuming its central role as Official Track Building Partner.

- As the race calendar is released, Volvo CE will continue to drive sustainability and safety across motorsport through its pioneering electric and digital solutions.
- The partnership has stepped up a gear with the company's expanding electric range of mid-size zero-emission machines for added sustainable strength.
- Volvo CE will again promote diversity with its role in World RX's only gender-balanced team: the CE Dealer Team by Volvo Construction Equipment.

Volvo CE is accelerating electromobility across the all-electric [World RX championship](#) through the use of its high-performing zero-emission solutions in building and maintaining the tracks at key locations around the world – mirroring the electric rallycross cars that will soon be racing on them.

As [Official Track Building Partner](#), Volvo CE is tasked with building new features on existing racetracks or sometimes [building courses entirely from scratch](#) – in the most sustainable and efficient way possible, and always under tight timeframes. The company is also tasked with maintaining the tracks and [recovering crashed cars](#) during the races themselves with its innovative safety solution.

These challenges require power, precision, and adaptability. Volvo CE's advanced electric machines are engineered to handle the unique challenges of shaping and maintaining these high-intensity circuits while reducing reliance on fossil fuels. With their near silent operation, electric machines increase efficiency by making it possible to build tracks during the night or during unsocial hours.

By integrating electromobility into track construction, the company is demonstrating the strength of its sustainable solutions in demanding, real-world applications like motorsport. This year, the solutions are getting bigger and better with the inclusion of new mid-size machines like the [L120 Electric and L90 Electric wheel loaders](#) and the updated [EC230 Electric excavator](#), now boasting a full day of operation.

The L120 Electric building the racetrack in downtown Hong Kong

This pioneering approach to drive efficiency and sustainability both on and off the track, allows the partnership to maintain the fast-paced thrills of motorsport with a lighter carbon footprint.

Volvo CE's commitment to sustainability extends beyond construction. The electric-powered [CE Dealer Team by Volvo Construction Equipment](#), the only gender-balanced team in World RX, returns to competition this season. It is a clear demonstration of how to combine high-performance motorsport with a bold, forward-thinking approach and brings the company's performance-driven, purpose-led mindset to the track.

Klara Andersson and Niclas Grönholm are vying for the title as part of the CE Dealer Team by Volvo Construction Equipment

Bill Law, Head of Brand Marketing & Communications for Volvo CE, said: "The FIA World RX Championship continues to be a fantastic format to raise awareness of the transition to a more sustainable future for construction and motorsport alike. Through an unbeatable mix of state-of-the-art sustainable power and digital innovation, we are proud to be leading the way for a new era of high-performing electromobility. Thanks to our continued partnership with the FIA, the 2025 season is set to be more dynamic than ever before."
